AXION™

LIFETIME TIRE BALANCE

AXION Tire Balance is a custom-formulated internal balancing compound made from a uniform material that delivers consistent density, durability, and reliable balance across the entire wheel assembly. Engineered with inert, soft materials, it enhances technician safety, reduces slip hazards, and protects TPMS sensors and wheel or tire components.

Anti-slip Formula

AXION's non-spherical, soft material provides inherent anti-slip properties, making it safe underfoot even if spilled.

TPMS Compatible

AXION and all Counteract compounds are third-party validated and certified safe for commercial and automotive TPMS systems.

Added Density

Unique fillers are added during production to achieve the ideal density and mass for optimal tire balance performance.

Moisture Resistant

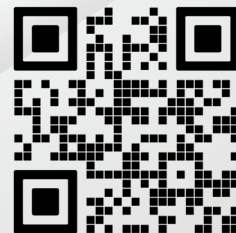

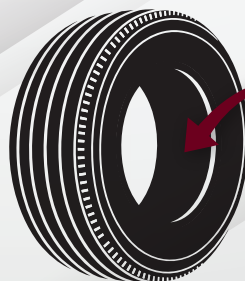

AXION's non-absorbent material resists oils and tire chemicals, while a hydrophobic coating keeps it clump-free.

Lifetime Tire Balance

AXION is a trouble-free, self-adjusting balancing compound that continuously balances the entire rotating wheel assembly.

JUST THROW THE CLEAR INSIDE BAG INTO YOUR TIRE!
